Jason Mustard

882 N Market St #4 Redding, California 96003
469.315.0484 | [Github](#) | [LinkedIn](#) | jdmustard@icloud.com

A creative Full-Stack Developer with a passion for building innovative applications utilizing modern web technologies. Specializes in end to end creation of web apps, with a passion for front end design, and engaging in a teamwork environment. Most of my professional experience is in Management and Leadership roles with a good dose of sales thrown in to make myself a valuable asset to any company.

Movie Buff Collection

January 2020

[FrontEnd Link](#) | [BackEnd Link](#)

Movie Buff Collection was developed by a 100% remote team of developers. The preface of the app was to be able to create a digital collection of movies that you either have seen, owned, or wanted to see. Done as a final project for coding school. | MEAN Stack, IMDB API, Angular routing, Node, Express, MongoDB, Passport with JWT authentication | Designed with Bootstrap and Angular Material
